

## What is Dr. Miracle ?

## Two distinctive features

### Continuous

Around one month⇒Reduce costs and extra cleaning work.

With only one spray, the product can send out ion rays continuously. It can last from two weeks to one month.

During this time, there is no need to spray again despite recurring causes of odour (pets and cigarettes)

### Safe

Perfect safety - The product is edible. The product meets the criteria (law relating to hygienic food) for the "Clean Water Inspection Standard". It is free from toxins and volatile organic chemicals. (The HACCPA certificate number 2005 A042-certified) (Colourless, transparent, odourless)

### 『Deodorizing』

Effective in combating toilet smells, tobacco smells, body odour, and fungal whiff. The product is neither a masking nor a fragrance which has deceived you before. Instead, this product will eliminate molecules that are the source of odour. So the effect is permanent and the odour will not recur.

### 『Protection against insects』

Bloodsuckers and dangerous insects in clothes are repelled (the efficiency rate against bloodsuckers is 83.5%). Bloodsuckers such as fleas lead to allergies which are harmful to both humans and pets. The use of pesticide cannot guarantee that they are eradicated entirely. Actually, the allergies are not due to bloodsuckers themselves but their remains and faeces. So it is wise to rely on natural prevention rather than use an insecticide or vacuum clean repeatedly.

### 『Sterilization』

The product can effectively destroy germs including MRSA, Edge pus germ, Yellow staphylococcus, Colon bacillus that causes food poisoning, and Trichophytosis germ (Athlete's foot germ), which could bring on viruses or a cold.

### 『Protection against fungi』

The product gets rid of fungi in air-conditioners, deep corners of a wardrobe, and in the air. It prohibits germs from spreading.
